What is there to do?

1. Submit publications to open access journals so that anyone can afford to access them.

2. Use open access journals in the institution to promote free access to research and information.

3. Use a Creative Commons license when publishing works so that they can be shared and used.

4. Publish your (& your institution’s) work on the Internet! Let others find it, learn from it and quote it.

Do this to help get international recognition!
