Learning for Development

COL is an intergovernmental organisation created by Commonwealth Heads of Government to encourage the development and sharing of open learning and distance education knowledge, resources and technologies.

Vision:
Access to learning is the key to development

Mission:
To help governments and institutions expand the scope, scale and quality of learning by using new approaches and technologies, especially those subsumed under the general term of open and distance learning (ODL).

Programme sectors and initiatives:

Education:
- Open schooling
- Teacher education
- Higher education
- Virtual University for Small States of the Commonwealth

Livelihoods & Health:
- Skills development
- Learning for farming
- Healthy communities
- Integrating eLearning

Key aims:
- Increase the number of trained teachers
- Open up access to secondary school to larger numbers of pupils
- Assist in the development of tertiary education
- Support skills development to improve the livelihoods of communities

Strategies:
- Partnerships
- Models
- Policies
- Capacity
- Materials

FOREWORD

COL in the Commonwealth is a companion text to Learning for Development, the Commonwealth of Learning’s Three-Year Plan for 2009-2012. This compendium reviews COL’s work over the last three years (2006-2009) country by country. Together these two documents are the springboard for the Country Action Plans that will guide COL’s future activities in each country over the 2009-2012 triennium and ensure that they are consistent with the national priorities of governments.

Ministers were enthusiastic about the previous issue of COL in the Commonwealth that was presented to 16CCEM in Cape Town in 2006. That report covered only developing countries whereas this one, at the request of Ministers, covers all members of the Commonwealth, showing also what COL has done in relation to the international development priorities of Australia, Canada, New Zealand and the United Kingdom. These country reviews are grouped under four regions: Africa (and the Mediterranean), Asia, the Caribbean and the Pacific.

COL tries to create synergy within regions and across the Commonwealth by bringing countries and institutions together in common endeavours. For this reason each grouping of countries begins with a short account of the regional activities which COL has promoted in 2006-2009.

Member States also greatly value COL’s Pan-Commonwealth work, which benefits from the unifying characteristics of the Commonwealth such as a common language, similar constitutional and legal frameworks, and a shared commitment to the values of peace, democracy, equality and good government. Some of the Pan-Commonwealth activities and facilities that underpin COL’s work in the regions and countries are listed in the next section.

The production of COL in the Commonwealth 2006-2009 has been an intense collective effort. COL’s advanced knowledge management systems have enabled us to exploit fully the information contained in the numerous event reports prepared by staff as they work and travel. I express particular gratitude to Jasmine Lee, for diligently updating the country profiles that provided the raw material for these reviews, and to Judith Mosley, who brought this volume together in an impressively efficient and expeditious manner.

Sir John Daniel
President and Chief Executive Officer
Commonwealth of Learning
BACKGROUND

As a Commonwealth inter-governmental organisation, the Commonwealth of Learning (COL) has the mandate to operate in all 53 member states. Its work focuses particularly on 46 developing countries across Africa, Asia, the Caribbean and the Pacific. COL also seeks to align its activities with the education and training priorities and the countries of particular concern for major donor agencies such as the Canadian International Development Agency (CIDA), the United Kingdom’s Department for International Development (DFID) and the New Zealand Agency for International Development (NZAID).

COL has developed Action Plans in consultation with Focal Points and country partners in the 46 member states, with activities specific to the individual needs of each country. However, several activities have a regional or pan-Commonwealth nature. This section looks at pan-Commonwealth activities.

QUALITY ASSURANCE IN EDUCATION

COL provides material and capacity building support for assuring quality in higher education and teacher education in the Commonwealth. A toolkit called the Quality Assurance for Teacher Education and Development Toolkit includes Quality Indicators for Teacher Education and Best Practices in Teacher Education, was launched in December 2007 to be used by Ministries of Education and teacher education institutions.

COL is also developing a quality assurance toolkit for open schools. As a first step towards this, staff members from 14 countries across all Commonwealth regions have been trained in the Quality Assurance of Open Schools. A Quality Assurance Toolkit for Higher Education is nearing completion.

OPEN SCHOOLS

COL encourages the application of open and distance learning (ODL) to increase access to primary and secondary schooling. In support of this, two publications, Perspective Series on Open Schools – Open Schools for the 21st
Century and Handbook for Managers of Open Schools have been completed with contributions from chapter authors across the Commonwealth. Both publications will be distributed as a resource to policymakers. Other resources which have been developed include the Evaluation Study on Open Schools and the Cost and Financing of Open Schools as well as a Learner Support Guide for Open Schools.

In addressing the need for quality educational resources, COL has initiated the development of Open Educational Resources for Open Schools (OER4OS) in 20 subjects involving six countries. The open educational resources (OERs) will be available to all Commonwealth countries.

ELEARNING FOR EDUCATION SECTOR DEVELOPMENT

COL has two major and related pan-Commonwealth initiatives in this area: WikiEducator and Learning4Content (L4C).

COL’s WikiEducator (www.col.org/WikiEducator) provides an online service to support online educational communities. Use of WikiEducator has grown rapidly during the past year with the number of registered users passing the 9,020 mark and number of hits per day now exceeding 247,653. A wiki is a website on which any user can edit and update pages. The best known is the Wikipedia, the biggest encyclopaedia ever produced. Wikis are a part of the emerging “Web 2.0” environment that includes user-contributed works such as YouTube and MySpace.

COL’s WikiEducator creates online communities whose members participate from remote locations to create educational content collaboratively and to plan conferences and other events. It is one of the tools used by the Virtual University of Small States of the Commonwealth (VUSSC). WikiEducator is reaching 79% of countries around the world and COL is now supporting the installation of a French language version.

The L4C initiative aims to build capacity among educators in using WikiEducator to develop free content for education. Training is free and educators “pay” for their training by donating time to develop one free content lesson of their choice. L4C workshops have already been held in 28 Commonwealth countries and at least one face-to-face workshop will be held in each member state. In addition, 26 online workshops have been held and others are scheduled. Commonwealth teachers and educators are thus becoming WikiEducators themselves, developing and donating one free content resource back to the WikiEducator community.

The William and Flora Hewlett Foundation approved a grant of USD 100,000 to COL over one year as core support for this initiative.

THE VIRTUAL UNIVERSITY FOR SMALL STATES OF THE COMMONWEALTH (VUSSC)

VUSSC is a collaborative network of small states that create and share materials for livelihood-related post-secondary programmes. Activities during this planning period have included capacity building and the creation, customisation and reuse of OERs. Quality assurance and cross-accreditation of learning programmes has also been an area of focus.

The VUSSC is a creation of the participating countries and their existing tertiary institutions. It is a collective mechanism for people to develop expertise in online collaboration, eLearning and information and communication technologies (ICTs). It also provides an opportunity for them to produce, adapt and deploy courses and learning materials on selected subjects identified by country Interlocutors and stakeholders.
The model that has emerged is a three-week training and course development workshop at which subject specialists from a subset of the participating states strengthen their information technology (IT) skills and begin to develop course material collaboratively online. Six workshops were held during this planning period:

1. Entrepreneurship and Tourism, hosted in Mauritius in August 2006.
3. Life Skills, hosted in Trinidad & Tobago in June 2007.

Orientations for the selected team leaders in preparation for the workshops took place in Vancouver six weeks before each workshop.

Senior officials from VUSSC countries met in Singapore in February 2008 to consider, refine and agree mechanisms of a transnational qualifications framework (TQF), the first of its kind. This will allow the 30 participating small states to transfer course materials, qualifications and qualified learners between countries. The South African Qualifications Authority, an organisation of the South African Government with more than twelve years experience in establishing frameworks in South and Southern Africa, helped to prepare a concept document and facilitate the proceedings.

The Ministry Interlocutors for VUSSC met in London in July 2008 to discuss the implementation of the TQF, the establishment of a management committee, the logo and branding of VUSSC, monitoring and evaluation, and copyright issues.

**TRANSNATIONAL PROGRAMMES**

COL designs, develops and delivers distance and technology mediated learning programmes for international organisations with a global workforce. During this planning period, COL has developed and delivered a number of new programmes including: Writing Effectively for the International Labour Organization (ILO); World Bank Writing E-mails, Memos and Letters and World Bank Report Writing; and an Operational Data Management Learning Programme for the United Nations High Commissioner for Refugees (UNHCR). These eLearning courses are designed to enhance the skill of staff working in field offices and in headquarters.

**GOOD GOVERNANCE**

COL promotes gender equality in all its programmes. Specific gender-related issues are identified during the workplanning process with country stakeholders and addressed through appropriate research, training and materials development.
COL and the Commonwealth Secretariat (ComSec) are working together to develop ODL training materials aimed at promoting good governance and gender equality in the public sector. The work is based on two workshops hosted by ComSec which concluded that there was limited capacity among the majority of policy makers, senior managers and professionals to mainstream gender equality in their daily work. A critical decision was to explore the role of ICTs and ODL in delivering training on a larger scale and to support research on flexible learning opportunities. A status report on what learning materials for gender mainstreaming are currently available to the public service concluded that while there are some materials available online, the current model for accessing the materials is not adequate.

A two-day meeting was convened in July 2008 to deliberate how best COL and ComSec could develop the required content using ODL tools. Invited participants included members of administrative staff colleges and other institutions involved in training public servants such as National Women's Machineries, Commonwealth partner agencies and resource people. The focus for piloting this initiative is Africa in the first instance.

COL-PROTEIN PROGRAMME

The COL Poverty Reduction Outcomes through Education Innovations and Networks (COL-PROTEIN) programme supports innovative uses of ODL to alleviate poverty in rural areas. In particular, COL-PROTEIN supports initiatives that adapt ODL, ICTs and media to build capacities for community development, for example, in areas such as food security, environmental protection, women's empowerment, micro-enterprise and good governance. Several projects across the regions have already been recipients of a COL-PROTEIN Award.

PAN-COMMONWEALTH FORUMS

More than 500 people from 64 countries and various international organisations gathered in Ocho Rios, Jamaica for COL’s Fourth Pan-Commonwealth Forum on Open Learning (PCF4) from 30 October to 3 November 2006. In his closing remarks, Sir John Daniel pointed to three key areas of progress since the Third Pan-Commonwealth Forum in Dunedin, New Zealand in 2004:

1. Better research
2. More participation from developing countries
3. Integration of technology.

COL was grateful to the local hosts of the Forum for ensuring the success of the event, in particular the University of the West Indies’ Distance Education Centre, in co-operation with the Caribbean Association for Distance and Open Learning, the Jamaican Association for Distance and Open Learning, the Trinidad & Tobago Distance Learning Association and the Office of Continuing Education and Distance Learning at the University of Technology, Jamaica.

The Fifth Pan-Commonwealth Forum on Open Learning (PCF5) took place in London, UK, in July 2008, with the theme "Access to Learning for Development". It was hosted by COL in collaboration with the University of London, as part of the University’s celebration to mark the 150th anniversary of the establishment of its External Degrees Programme. PCF5 brought together practitioners, researchers, planners and policy makers in the fields of ODL and development to explore the contribution of ODL to international development goals. Over 700 participants from over 70 countries, the majority from the developing Commonwealth, took advantage of opportunities to share experience and expertise, and to contribute to future policy and provision.
COL NEWS SERVICE & NEWSLETTER

COL customises services provided by Google and Yahoo to provide a news service on ODL and specialised topics. The general news service is available from COL’s homepage while the specialised services are available on the appropriate topic pages on the website. The news service is updated approximately every hour.

COL publishes a newsletter, Connections, and a companion publication, EdTech News, three times per year, designed to provide regular news and information to COL’s stakeholders. The publications are distributed in print and electronically directly to 10,000 government officials, ODL and educational technology leaders and practitioners throughout the Commonwealth and beyond. The newsletter offers updates on COL and partner activities; ODL developments, resources and events; and educational technology reviews – all with a “development” focus. It also features an “In Focus” section which highlights a different COL programme in each issue, and periodic editorials as well as “Fair Comment” columns from external sources. It can be found on COL’s website at www.col.org/connections.

COPYRIGHT FOR EDUCATORS AND ADMINISTRATORS

COL has worked extensively in the area of copyright in education. The focus of COL’s attention is on providing information on how learning resources may be made available at low or no cost by applying the Trade Related Aspects of Intellectual Property Rights Agreement (TRIPS). In early 2009 COL published a book on copyright for educators and administrators titled Introducing Copyright which is available on the COL website at no cost.
Pacific

Fiji Islands | Kiribati | Nauru | Papua New Guinea | Samoa |
Solomon Islands | Tonga | Tuvalu | Vanuatu
REGIONAL ACTIVITIES

BACKGROUND

The Pacific region is home to 11 Commonwealth member states, including larger countries such as Australia and small island states such as Nauru. This diverse region is divided into three areas, Melanesia (Fiji, Papua New Guinea, Solomon Islands and Vanuatu), Micronesia (Kiribati and Nauru) and Polynesia (New Zealand and Cook Islands, Samoa and Tonga).

Within the region, there is considerable expertise and leadership in open and distance learning. Australia has a long history of distance education and is the model of best practice in dual-mode provision. Fiji has developed multi-modal distance education through the University of the South Pacific (USP). New Zealand is a leader in how distance education can be used for technical and vocational education and training.

FREE/LIBRE AND OPEN SOURCE SOFTWARE FOR EDUCATION INITIATIVE

The Free/Libre and Open Source Software for Education (FLOSS4Edu) initiative is promoting the development of free content in education using open source software tools among educators. Following the establishment of the East African Chapter in Kenya and the West African Chapter in Ghana, COL launched the initiative in the Pacific region.

In collaboration with the Ministry of Education, New Zealand, COL hosted a regional workshop on open educational resources (OERs) in August 2007 in Wellington, New Zealand. Nominated representatives from Kiribati, New Zealand, Niue, Samoa, Solomon Islands, Tonga, Tokelau and Tuvalu attended the workshop. The workshop established a firm foundation for future collaboration in eLearning for the region. The group also successfully launched a Pacific chapter of the FLOSS4Edu initiative called WikiPacifica and have commenced planning for both national and regional activities associated with the development of OERs.

The workshop developed a number of recommendations for the region:

- Establish and promote wiki Ambassadors for each country,
- Conduct workshops on the use of WikiEducator,
- Utilise existing wiki support resources and integrate with locally available resources,
- Re-examine existing and/or develop new policies in the light of the outcomes of this workshop,
- Maintain and promote national and regional networks for OERs,
- Lobby publicly-funded content development projects to release materials under a free content license,
• Develop fundraising strategies,
• Advocate senior-level support and commitment.

LITERACY AND OCCUPATIONAL TRAINING

COL continues to work with the Pacific Association of Technical and Vocational Education and Training (PATVET) to develop and offer basic trades courses for young people throughout the region. During this planning period, three courses were made available, in Timber, Concrete and Small Engines.

DISTANCE LEARNING FOR AGRICULTURAL AND RURAL DEVELOPMENT

COL and USP A lafua Campus, Samoa, organised a regional strategic workshop on the theme of Delivering Distance Learning Programs for Agriculture and Rural Development in June 2007 in Samoa. The workshop engaged 23 participants in presentations and discussions about strengthening the role of the School of Agriculture and Food Technology, at USP in Samoa, in distance learning for agriculture and rural development across the South Pacific. Participants represented the Cook Islands, Kiribati, Samoa, Solomon Islands, Tonga, and Vanuatu, as well as the Secretariat of the Pacific Community, and the Food and Agriculture Organization of the United Nations (FAO).

It was agreed that appropriate distance learning strategies could help address challenges related to agriculture and rural development in the region. Further, the Alafua Campus received specific advice regarding the formal and informal educational programming that would be most useful in this field. Three potential objectives for collaboration were identified:

• Developing Lifelong Learning for Farmers work for uptake at a regional level through USP.
• Collaboration between USP Alafua Campus and COL for non-formal and continuing education at Alafua.
• Collaboration with USP Alafua Campus and other stakeholders in the region, including the National University of Samoa, the FAO and other local and regional agencies, including some units affiliated with the United Nations or the European Union.

The initiative is now with the USP Alafua campus to confirm next steps.

REGIONAL FOCAL POINTS MEETING

The first Regional Focal Points Meeting for the Asia and Pacific regions was held in Kuala Lumpur, Malaysia, in October 2008. These meetings are planned to take place every three years. At the 2008 meeting, each participant reviewed, on behalf of their country, the progress that had been made so far in COL’s current Three-Year Plan 2006-2009, provided feedback on COL’s planning process and gave concrete inputs for developing the next Three-Year Plan 2009-2012. The meeting also provided a valuable opportunity for networking, facilitating future inter-country collaboration. As part of the event, the group visited the Open University Malaysia and Universiti Tun Abdul Razak.
REGIONAL BROCHURES

COL has regional brochures which summarise its activities in each of the four regions of the Commonwealth. These can be found on COL’s website at: www.col.org/regional.
BACKGROUND

Papua New Guinea is the largest of the Pacific Island countries, yet with a population just over four million, qualifies as a small state of the Commonwealth. The country faces many significant development challenges including a growing level of HIV/AIDS and many people without access to clean water. Papua New Guinea is a priority country for NZAID and the organisation signed a joint strategy with the government in July 2008. Education, health and rural livelihoods were all identified as priority areas and a focus was put on addressing gender inequality.

COL’s work in Papua New Guinea is the most extensive in the Pacific region and the country works in partnership with COL, participating fully in regional and pan-Commonwealth opportunities. The Regional Representative for the Pacific on COL’s Board of Governors since January 2008, The Honourable Dr. Dame Carol Kidu, Minister for Community Development, Women, Religion and Sports, is from Papua New Guinea. The Open College at the University of Papua New Guinea (UPNG) has been a partner in many COL initiatives and received Awards of Excellence at both recent Pan-Commonwealth Forums.

SUMMARY

COL’s work in Papua New Guinea in 2006-2009 has been in all three sectors, Education, Learning for Livelihoods and the Human Environment.

In Education, the focus is on quality assurance, teacher education and supporting the development of open/alternative schooling. Papua New Guinea is participating in the activities of the Virtual University for Small States of the Commonwealth (VUSSC). In Learning for Livelihoods, the focus is on rural and peri-urban community development where the feasibility of introducing the Lifelong Learning for Farmers (L3F) programme is being explored. Additionally, the opportunity to use open and distance learning (ODL) and information and communication technologies (ICTs) to promote education and training related to issues such as water use management, global warming and climate change are being explored. COL is providing training for local government as well as supporting health education, particularly in the battle with HIV/AIDS through the effective use of mass media.
EDUCATION

Teacher development

A COL consultant completed a review of the Teacher Education Programme at the Open College, UPNG and the report was submitted in late 2007 with clear recommendations on the way forward.

Open/alternative schooling

Papua New Guinea was one of 11 participating countries from across the Commonwealth to attend a workshop on “How can ICTs enhance the capacity of Women in Leadership?” in Vancouver in November 2008. A participant from UPNG attended the workshop which featured presentations, discussions and site visits to educational institutions. The workshop’s recommendations and findings informed the development of self-instructional materials that can be used to help women in leadership positions in open schools to embrace the potential of ICTs.

Papua New Guinea is contributing to the development of one of two new publications for open schools through a chapter author, from UPNG, for the Perspective Series on Open Schools – Open Schools for the 21st Century.

Other COL support for open schools have included staff members from Papua New Guinea receiving training in learner support and also in quality assurance as a step towards a quality assurance toolkit for the schools.

Higher education

COL provided two consultants to undertake reviews. The first was of the existing models of dual mode delivery and recommended how the higher education systems in Papua New Guinea could be improved. The second was a review of quality assurance in higher education in the country. Both reports were submitted in 2008 and officials in Papua New Guinea are considering the recommendations.

The Commonwealth Executive Master of Business Administration/Master of Public Administration (CEMBA/CEMPA) programme has been expanded to UPNG.

E Learning for education sector development

A delegate from Papua New Guinea, from Department of Education, Flexible Open and Distance Learning, attended the regional open education resources workshop, organised by COL and the Ministry of Education, New Zealand and held in Wellington, New Zealand in August 2007.

As part of the major pan-Commonwealth initiative, Learning4Content (L4C), Papua New Guinea hosted two face-to-face workshops, in March and August 2008.

LEARNING FOR LIVELIHOODS

Rural and peri-urban community development

COL is working with the National Agricultural Research Institute (NARI), UPNG Open College and other stakeholders concerned with improving the livelihoods of farmers and rural women, by helping them to introduce or
adapt COL’s Lifelong Learning for Farmers (L3F) programme and to identify and prioritise ODL strategies which will increase access for farmers and rural women to lifelong learning and earning opportunities.

An initial meeting among potential partners took place at Port Moresby during September 2007 during which the partners agreed to review the potential communities for a L3F initiative in Papua New Guinea. A COL consultant conducted a needs analysis and feasibility study for introducing or adapting components of the framework. The study took place from 27 February to 7 March 2008 and a report and budget were provided.

COL supported a representative from NARI to participate in the meetings and site visits related to the L3F programme in India and Sri Lanka. NARI now plans to implement the programme, co-ordinated from Bubia in the Morobe Province in partnership with the University of Technology (Unitech) and UPNG Open College.

The South Pacific Institute for Sustainable Agriculture and Rural Development (SPISARD) of the Department of Agriculture of Unitech, was the recipient of a COL-PROTEIN Award for 2008. The proposal titled “Training of Women and Youth at Selected Model Villages in Papua New Guinea” aimed to establish a kiosk information centre and work with model villages through ODL mode in support of women and youth to have access to their livelihoods need-based learning.

**National/international community development**

COL is supporting the Papua New Guinea Association of Distance Education (PNGADE), facilitating the involvement of representatives from a wider range of areas and interests including agriculture, literacy, community development, health and gender. During this period, PNGADE has been active in widening ODL coverage through increasing membership and partnership. Two conferences organised by PNGADE were well attended by policy makers, professionals and practitioners. COL provided financial support for the 2008 conference where COL’s President & CEO gave the keynote address.

**Virtual University for Small States of the Commonwealth (VUSSC)**

Papua New Guinea is an active member of VUSSC. During 2006-2009, activities have included capacity building and the creation, customisation and reuse of OERs. Quality assurance and cross-accreditation of learning programmes have also been a focus area in this planning period. Participants from Papua New Guinea attended five of the six training and course development workshops that took place, from UPNG, the National Department of Health, NARI Livestock Programme and the University of Goroka. On two occasions workshop team leaders were from Papua New Guinea.

Papua New Guinea is participating in the development of the transnational qualifications framework. The country has submitted its national qualifications framework for analysis and a representative from the Office of Higher Education attended the officials meeting in Singapore.

Papua New Guinea also attended another key VUSSC meeting when the Interlocutors met in London in July 2008.
HUMAN ENVIRONMENT

Health, welfare and community development

COL, in partnership with the World Health Organization has continued to support the NGO, Anglicare STOPAIDS in its efforts to address HIV/AIDS prevention and stigma in the country. In April 2007, with the addition of large screens and projection systems, COL increased the capacity of the organisation to deliver health information to larger audiences throughout the country.

Good governance

COL is supporting local level government training as part of the public service reform initiative involving all levels of government and a number of training institutions. COL is working directly with UPNG in this activity. The work is intended to be gender sensitive. Two workshops were held in Port Moresby, coordinated by UPNG Open School to bring together all training partners, senior levels of government and the European Union to jointly develop curricula and a plan of action. Course materials are in development at UPNG with a unique system of learner support to facilitate success. Two modules have been developed.

COL and the Commonwealth Secretariat (ComSec) are working together to develop ODL training materials aimed at promoting good governance and gender equality in the public sector. A two-day meeting was convened in July 2008 to deliberate how best COL and ComSec could develop the appropriate content using ODL tools. The focus for the initiative in the first instance is Africa. Papua New Guinea participated due to COL’s current focus there on governance issues. Three delegates from Papua New Guinea attended, among them the High Commissioner to the UK along with the Executive Director of UPNG Open College and a representative of the Department of Provincial and Local Government Affairs. The Minister for Community Development, Women, Religion and Sports contributed a short taped interview on her views and ideas on the importance and challenges of gender mainstreaming for the public sector.

COL supported the distribution of DVD drama and activity guides on conflict resolution and women’s role in society to village cinema events, schools and television in Papua New Guinea in September 2008. The materials were produced in Vanuatu with COL’s support.

OTHER ACTIVITIES

Pan-Commonwealth Forum

COL’s Fourth Pan-Commonwealth Forum on Open Learning, held in Ocho Rios, Jamaica from 30 October to 3 November 2006 was attended by five delegates from UPNG. In addition, COL sponsored four delegates, including two from the Department of Education and one from Unitech. The Degree-Granting Programme submitted by UPNG was a recipient of an Award of Excellence for Learning Experience.

The Fifth Pan-Commonwealth Forum on Open Learning, held in London in July 2008, was attended by 16 delegates from Papua New Guinea including seven sponsored by COL, from Unitech, UPNG, Divine Word University, Bougainville Open University Campus and the Department of Finance. UPNG was a recipient of an Award of Excellence for Institutional Achievement.
Regional Focal Points meeting

The Regional Focal Points meeting for the Asia and Pacific regions, held in Kuala Lumpur, Malaysia in October 2008, was attended by the COL Focal Point for Papua New Guinea.

Appointments

The Honourable Dr. Dame Carol Kidu was appointed Regional Representative for the Pacific on COL’s Board of Governors in January 2008.

LOOKING FORWARD

As we look forward to 2009-2012, Papua New Guinea’s strong partnership with COL will provide an excellent foundation for further progress in all areas with many initiatives already in progress across all three sectors. The possible implementation of the L3F programme will be an important development and will be of interest to other countries in the region.
